Re: Strategic Course at Fox Hills Golf & Banquet Center

To Whom It May Concern:

On behalf of Fox Hills, I would like to take this opportunity to highly recommend Ray Hearn and his firm, Ray Hearn Golf Designs, as outstanding golf course architects. Ray has been a pleasure to work with and handled our project in a very professional manner. In addition, we believe that he and his firm achieved in their design, a very upscale, beautifully sculpted, state-of-the-art 18-hole par-three course. As owners, we were extremely pleased with the outcome of the project. Ray and his staff were available when needed, attentive and anxious to please.

Prior to the addition of the Strategic Course, Fox Hills was a 45 hole complex consisting of a 27 hole regulation course and an upscale 18 hole Championship Course. To complement our facility, we wanted to develop a golf course that would be attractive to beginning golfers and not as intimidating as so many of the new courses being built today. We had about 60 acres of vacant land available to us. We interviewed several architects but only Ray seemed to really understand what it was that we wanted to accomplish, probably because he had designed a similar course in Oklahoma. We believe the outcome speaks for itself. The course is beautiful and has been well received by families, beginners and even the better players who want to sharpen their short game.

Since Ray's headquarters and home are near Fox Hills we have had the added advantage of his proximity. Ray has always been very responsive, amicable and willing to work with owners. We highly recommend Ray and Ray Hearn Golf Designs.

If you have any questions, please do not hesitate to contact me.

Sincerely,

Kathleen Dul Aznavorian  
President
